BUSINESS OVERVIEW

We commenced our business in construction sector in 2003 and are an established contractor in the Hong Kong car park flooring industry. We provide (i) flooring services, which involve the application of proprietary floor coating products for the purpose of providing a colourful, slip-resistance, hard wearing surface that is resistant against water and petrochemicals; and (ii) ancillary services, which include concrete repairing and wall painting work in Hong Kong. Our target segment is the mid to high end customers in the car park flooring market.

SUMMARY

Our subcontractors

We act as either a main contractor or subcontractor when carrying out car park flooring and ancillary works. During the Track Record Period, we outsourced part of our works, such as application of proprietary floor coating products, screeding, and painting of line markings and signage, to subcontractors for the purposes of better allocating our resources, whether or not we acted as a main contractor or a subcontractor.

Our suppliers

Our suppliers primarily supply the following materials to us: (i) proprietary floor coating products for car park floor coating, screeding and anti-skid surfacing; (ii) cement; (iii) sand; and (iv) shot-blasting beads. During the Track Record Period, our material costs were approximately HK\$15.0 million and HK\$19.8 million respectively, representing 62.8% and 55.2% of our total costs of sales.

Reliance on major suppliers

During the Track Record Period, we relied on Supplier A, our largest supplier for supplying reputable car park floor coating materials. For FY2015 and FY2016, the percentage of our purchases from Supplier A was 77.8% and 80.1% of our total purchases for the corresponding periods, respectively, while the percentage of our purchases from our five largest suppliers in aggregate was 97.3% and 97.2%, respectively. For FY2015, FY2016, and the period from 1 April 2016 to the Latest Practicable Date, 79.6%, 81.8% and 74.1% of our Group's revenue, and 78.9%, 80.4% and 70.4% of our Group's gross profit were attributed to floor coating products sourced from Supplier A, respectively, while 19.7%, 15.0% and 17.5% of our Group's revenue, and 19.9%, 16.3% and 24.2% of our Group's gross profit were attributed to floor coating products sourced from Supplier B, respectively. For FY2015 and FY2016, our gross profit margin attributable to projects using Supplier A's products were 43.6% and 46.8%, and our gross profit margin attributable to projects using Supplier B's products were 44.7% and 52.0%.

For detailed analysis of the reasons for our reliance on Supplier A and the sustainability of our business in view of our reliance, please refer to the section headed "Business – Suppliers and Procurement of Materials – Reliance on major suppliers" in this prospectus. Please also refer to the section headed "Risk Factors – Risks relating to our business – Our business heavily relies upon certain major suppliers for supplying reputable car park floor coating materials" in this prospectus for our supplier concentration risk.

Our pricing strategy

Our pricing is determined on a case-by-case basis. Factors that we take into account in determining our fees generally include (i) product specifications; (ii) our customer's budget; (iii) relationship with our customer; (iv) competition; (v) overall cost in undertaking the project; (vi) expected duration of project; and (vii) prevailing market conditions. For example, we may set a higher price for tenders that specify Supplier A's or Supplier B's proprietary floor coating products as the approved materials, as we are Supplier B's sole distributor in Hong Kong and Supplier A's "preferred applicator" in Hong Kong and so have a competitive advantage in bidding for the tender. Alternatively, if the tender specifications favour floor coating products that are generally or exclusively distributed by our competitors, we will be inclined to set a more competitive price in order to compete for the tender. We also tend to set a more competitive price if (i) we have long and harmonious work relationship with the customer; (ii) the project is not expected to have undue delays; or (iii) the prevailing market conditions are unfavorable.

SUMMARY

According to the Industry Report, for FY2015, we ranked second in the overall car park flooring industry in Hong Kong with a 7.0% market share, and ranked first in the new construction market of car park flooring industry in Hong Kong with a 33.7% market share.

SUMMARY

RECENT DEVELOPMENT AND NO MATERIAL ADVERSE CHANGE

As at the Latest Practicable Date, we had 32 contracts on hand with a total outstanding contract value of HK\$49.5 million, among which 11 were in progress with total outstanding contract value of HK\$8.6 million, and 21 had yet to commence work with total contract sum of HK\$40.9 million. Out of the 32 contracts on hand, four of them were sizeable contracts with contract sum of over HK\$5 million each. These four contracts involve provision of car park flooring works for a new construction project in a residential development on Clear Water Bay Road, Sai Kung, a new construction project in a residential and commercial development in Tseung Kwan O, a new construction project in a residential and commercial development in Tsuen Wan, and a new construction residential development project in Yuen Long.

For details of projects in progress or not yet commenced, please refer to the section headed “Business – Projects undertaken by our Group – Projects in progress or not yet commenced” in this prospectus.

Save as disclosed in the paragraph headed “Listing Expenses” in this section, Our Directors confirm that there has been no material adverse change in the financial or trading position of our Group since 31 March 2016 (being the date to which the latest audited combined financial statements of our Group were made up) up to the date of this prospectus.

SELECTED FINANCIAL INFORMATION

The tables below present the selected financial information of our Group for the Track Record Period, which were set forth under the section headed “Financial Information” in this prospectus and should be read in conjunction with the Accountant’s Report in Appendix I to this prospectus.

During the Track Record Period, our revenue were approximately HK\$42.8 million and HK\$68.6 million respectively; whereas profit after tax were approximately HK\$11.1 million and HK\$16.8 million respectively. Our revenue increased by 60.2% or approximately HK\$26.0 million from FY2015 to FY2016 mainly due to an increase in number of larger contracts secured and completed in FY2016.

Our gross profit and gross profit margin were approximately HK\$ 18.9 million and 44.1% for FY2015, and HK\$ 32.7 million and 47.6% for FY2016. Our increase in gross profit approximately was in line with our increase in revenue during the Track Record Period. Increase of our gross profit margin was mainly due to our securing of a project with the total contract sum of approximately HK\$10 million in a commercial development at a shopping mall in Tsuen Wan with a relatively higher profit margin.

Our administrative expenses increased significantly from approximately HK\$5.8 million in FY2015 to approximately HK\$11.8 million in FY2016. Such increase was mainly due to the non-recurring expenses of approximately HK\$4.1 million incurred in FY2016 in relation to the Listing and increase of staff cost attributable to increase in headcount and salary increment.

Upper tier subcontractors	38.2%	55.5%

SUMMARY

Our gross profit margin from public sector increased from 30.5% for FY2015 to 64.2% for FY2016. Such increase was mainly due to our ability to secure a project on Po Heung Street with a relatively high profit margin. The project was awarded by Hong Kong Housing Authority with special site requirements and therefore requires the car park flooring materials tailored for its site conditions. Since our revenue was mainly derived from private sector, the increase of gross profit margin from public sector did not have significant impact to our overall gross profit margin during the Track Record Period.

Our gross profit margin from new construction projects increased from 41.4% for FY2015 to 47.9% for FY2016. Such increase was mainly due to our ability to secure projects in a commercial development on Hung Luen Road, Hung Hom and a retirement residential development on Tanner Hill Road, North Point with relatively higher profit margins in FY2016.

Our gross profit margin from refurbishment projects decreased from 54.2% for FY2015 to 46.1% for FY2016. Such decrease was mainly due to a project in shopping mall in Yuen Long with a relatively higher profit margin secured in FY2015.

Since our revenue was mainly derived from customers which are main contractors, the changes in gross profit margin from customers such as property management companies or upper tier subcontractors did not have significant impact to our overall gross profit margin during the Track Record Period.

You should read the entire section headed "Risk Factors" in this prospectus carefully before you decided to invest in the Offer Shares. - Introduction and acceptance of new car park floor coating material in Hong Kong with similar characteristics may adversely affect our profit margin;
- Any economic downturn in Hong Kong may delay refurbishment of car parks in older buildings and will exert cost pressure on tenders which will have an adverse effect on our planned business expansion in the refurbishment sector;
- We have a concentration of customers during the Track Record Period;
- Our success significantly depends on the key management and its ability to attract and retain additional technical and management staff; and

SUMMARY

REASONS FOR THE LISTING

Over the years, our business focus has been to provide car park flooring services to new construction market. Based on our business plan, in order to expand our reach in the refurbishment market, which was, according to the Industry Report, 5.3 times the size of new construction market in terms of car park flooring revenue in 2015, and to further develop the new construction market segment, we need to raise long term capital.

We also believe a listing status would enhance our corporate profile and recognition and reinforce our brand awareness and image among both our existing and potential customers. It would also generate reassurance amongst our existing customers, suppliers and strengthen our competitiveness in the market. In the context of our planned business expansion of the refurbishment market, a public listing could place more confidence amongst a wide customer base to which we aim to pursue in this segment. It would also enable us to convince new suppliers of car park flooring materials to establish business relationship with us and to grant us better terms.

Prior to the Listing, funding of our business activities was primarily from internally generated cash of our own. We had approached commercial banks in the past for credit facilities. However, most banks would require collateral, either in the form of cash or immovable assets as such property. As we do not have property assets available for collateral, it has been difficult for us to secure bank borrowings, without the support by our Controlling Shareholders and on terms which we find favourable. In order to seek funding for payment of expenses associated with the Listing exercise prior to the actual listing, the Controlling Shareholders had invited the Pre-IPO Investors to invest in a total of 16.5% interest in our Company. Pursuant to share sale and purchase agreements dated 14 August 2015, Sage City sold a total of 1,650 existing shares of Victor Ease, the intermediate holding company of KMK, to four groups of investors for an aggregate consideration of HK\$15,427,500. Of this amount, HK\$10.3 million was advanced by the Controlling Shareholders to our Group to pay for professional expenses relating to the Listing in June 2016. On 19 September 2016, in preparation for the Listing exercise, a commercial bank in Hong Kong granted us an overdraft facility of HK\$10 million. Such facility was drawn down in late September 2016 to repay the above loan advanced by our Controlling Shareholders prior to the Listing. It is currently expected that the Share Offer would broaden not only our equity financing alternatives to cover public investors but could also enable us to seek bank financing under more favourable terms to finance our future business needs.

We also consider that a Listing may offer our Company a broader shareholder base which could potentially lead to a more liquid market in the trading of the Shares. With the appointment of our independent board of non-executive Directors, we also believe our internal control and corporate governance practices will be enhanced following the Listing.
